PROJECT DATES: November – December 2015
PROJECT VALUE: £45k

PROJECT DETAILS

Performance Pro is a gymnasium based in West London who help company teams, professional sports people, business leaders, dedicated gym-goers and anyone who just wants to get fitter. Their team of ex-athletes and strength & conditioning trainers provide advice and use equipment that is the preserve of elite athletes.

Prestige were engaged to refurbish the reception and main gym area including additional shower facilities and creation of a new consultation room. The works consisted of partitioning, ceilings, flooring, installing decorative wall panels and shower facilities.

CLIENT STATEMENT

Prestige Interiors completed our original fit out in 2013. When it was time for an upgrade we did not hesitate in asking them to plan and complete the works.

Completing a total refit of a working premise's is not an easy task. Prestige pulled out all the stops to work around our busy company schedule. Many tasks were completed in silent hours, weekends or very early in the morning.

In addition, Rob Weare and Patrick Corrigan went to great lengths to source very specific materials, even taking myself to meet one of the manufacturers.

Working to a very tight time line, the Prestige team brought our vision to life with patience and ingenuity. As with our previous fit out, we were always given solutions rather than problems or alternative ways of achieving desired outcomes.

Prestige give you confidence and remove much of the stress related to building works including; liaising with the landlords management team and surveyors, providing all necessary documentation for planning, risk assessments and method statements. Their team of craftsmen are reliable, accommodating and dedicated.

Having worked with Patrick Corrigan exclusively on our initial build in 2013, it was a pleasure to work with him again and much credit must also go to Rob Weare who put many hours into solving our never ending list of additional works. I look forward to working with both of them again on our next project.
