CUSTOMER: Skanska

CONTACT: Bruno Condé

PROJECT DATES: July 2015

PROJECT VALUE: £6k

PROJECT DETAILS

Skanska are a world leading project development and construction company.

Prestige Interiors carried out flooring and decoration works following flood damage. This consisted of stripping back areas of damaged walls, ceilings and skirtings and patching in with plasterboard where necessary. We decorated the damaged areas and applied stain block to any areas where stains showed through. We also repaired the damaged skirtings and repainted.

The damaged flooring was removed and new carpet installed.

CLIENT STATEMENT

Jamie is one of the most professional contractor/employees I have ever come across. He has got a very positive approach and a 'can do attitude' to every situation making us feel confident that, whatever problem that arises during the works, will be dealt with properly and get resolved in the most efficient manner. It is a pleasure working with him.

Please pass my compliments onto the team for such a great asset.

Kind regards,

Bruno
